DETAILED ACTION

1. This office action is in reply to an amendment filed on October 16, 2006. Claims 1, 8, 12, 19 and 31 have been amended. Claims 1-40 are pending.

Response to Arguments

2. Applicant's arguments, see applicant's remarks pages 13-17, filed October 16, 2006, with respect to 35 USC 101 rejections of claims 1-40 have been fully considered but they are not persuasive. Applicant argues that, in the present invention, the specification provides a description of utility and tangibility of the recited subject matter and therefore, the claimed subject matter has a specifically described useful, concrete and tangible result and application. Examiner disagrees.
3. Examiner would point out that the claims do not produce a real-world result, which is a requirement for claims to produce tangible result. In this case comparing values and providing an indication is not a tangible result. Examiner would suggest amending the claims to specifically identify how the indication is provided, for example by displaying/storing/transmitting etc., (in view of the specification) so that the claims clearly produce a tangible result.
4. Applicant's arguments, see applicant's remarks pages 17-18, filed October 16, 2006, with respect to 35 USC 101 rejections of claims 8-11, 13 and 31-36 have been fully considered and are persuasive. The rejections of claims 8-11, 13 and 31-36, under 35 USC 101 as being directed to functional descriptive material (software) has been withdrawn in view of the amendments to the claims.
5. Applicant's argument's, see applicant's remarks pages 18-19, filed October 16, 2006, with respect to 35 USC 101 rejections of claims 1-7, 18-22, 30 and 40 have been fully considered but they are not persuasive. Applicant argues that in view of the amendment to the

claims and the argument present above with respect to tangibility the claims are statutory.

Examiner disagrees.

6. Examiner would point out that the above claims are directed to a functional descriptive material (computer program/software) that is embodied in a **data signal/carrier wave**.

Examiner would further point out that a claim reciting a signal encoded with functional descriptive material does not fall within any of the categories of patentable subject matter set forth under 35 USC 101.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 1-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

9. Claims 1-40 are directed to a hashing method of generating/comparing plurality of sub-hash keys. The examiner respectfully asserts that the claimed subject matter does not fall within the statutory classes listed in 35 USC 101. The claimed steps do not result in a tangible result. Claims 1-40 are rejected as being directed to an abstract idea (i.e., producing non-tangible result) [tangible requirement does require that the claim must recite more than a 101 judicial exception, in that the process claim must set forth a practical application of that 101 judicial exception to produce a real-world result, Benson, 409 U.S. at 71-72, 175 USPQ at 676-77].

10. Claims 1-7, 18-22, 30 and 40 are directed to a hashing method of generating/comparing plurality of sub-hash keys. The examiner respectfully asserts that the claimed subject matter does not fall within the statutory classes listed in 35 USC 101. Claims 1-7, 18-22, 30 and 40 are directed to a computer readable media that includes data signals (see specification page 19). A signal does not fall within one of the four statutory classes of 101. Claims 1-7, 18-22, 30 and 40 are rejected as being directed to data signal.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
